PAULA

The Paula is compact design. It is the perfect way to increase your service level on the front-end. This next-generation terminal allows you to deliver a world-class checkout experience no matter the size of your checkout space. Designed for contactless transactions, the Paula has fewer equipment failures and attendant interventions than full cash self-checkout. Retailers are installing these in their stores as express lanes, improving the customer experience, driving more customer traffic through self-checkout, and reducing costs.

K27 II

Cut labor costs, reduce wait times, and boost capacity effortlessly with Partner Tech's K27 II kiosk, ideal for quick-service restaurants, as well as hospitality and retail settings. The K27 II allows you to optimize floor space with its compact design, available in wall mount or floor stand options, including the flexibility of double-sided operation.

Equipped with a 3-inch thermal printer and a customizable range of peripherals, the K27 II adapts to your needs. Choose from options such as a 2D barcode scanner, EMV terminal brackets, 5MP camera, RFID/NFC reader, ADA keypad, and LED indicator lights. Engineered for maximum reliability and uptime, and the rugged and lockable enclosure shields the kiosk from damage. Easy-to-replace modules keep repair costs low but, also minimize disruptions to your operations.
Double Sided

Self-service kiosks cut down lines during peak hours.
